

COLLABORATIVE LEARNING TRUST

Working Together to Secure Success

TRUST POLICY: DATA PROTECTION

Date Approved	February 2026
Next review date	October 2027

Executive Summary

This Data Protection Policy serves as a comprehensive framework for our Trust to ensure that all personal data handled within the trust and academy environment is managed in a manner that complies with all relevant data protection laws.

The Trust is committed to fostering a culture of data protection and privacy, recognising the importance of safeguarding personal information belonging to students, parents, staff, and other stakeholders. This policy outlines our approach to collecting, processing, storing, and sharing data, ensuring that rights and freedoms are respected.

Key Objectives of the Policy:

- **Transparency:** We aim to communicate clearly how and why personal data is collected and used, ensuring that individuals are informed and can exercise their rights.
- **Data Integrity and Security:** We implement robust security measures to protect personal information from unauthorised access, loss, or misuse.
- **Compliance:** We adhere to all legal and regulatory requirements related to data protection, including conducting regular audits and training staff on best practices.
- **Rights of Individuals:** We empower students, parents, and staff to understand their rights regarding their personal data, including the right to access, rectify, and delete their information upon request.

This policy is an essential element of our commitment to creating a safe and secure environment for our Trust community. It is reviewed annually or as needed to accommodate changes in legislation.

1. Aims

This Data Protection Policy outlines our commitment to maintaining the privacy and protection of personal data in accordance with the Data Protection Act (2018) and UK General Data Protection Regulation (GDPR) as amended by the Data (Use and Access) Act 2025 and relevant data protection legislation.

The policy is intended for (not exhaustive):

- Staff: All employees, including teaching and non-teaching staff, who handle personal data of students, parents, staff and other stakeholders
- Leadership Teams and Trustees: Individuals responsible for overseeing and ensuring compliance with data protection practices
- Parents & Guardians: This policy provides essential information on how the Trust manages their children's personal data and outlines their rights regarding that data
- Third Party – Contractors: External organisations or individuals processing data on behalf of the Trust must understand their responsibilities under this policy.

We aim to make sure that all personal information about staff, students, parents, trustees, governors, visitors, and others is collected, stored, and used according to UK data protection laws (the UK General Data Protection Regulation and the Data Protection Act 2018). This policy covers all personal data, whether it is on paper or stored electronically.

2. Legislation and guidance

This policy meets our obligations under the:

- Data Protection Act 2018 (DPA 2018)
- UK General Data Protection Regulation (UK GDPR)
- Data (Use and Access) Act 2025 (DUAA)

It is based on guidance published by the Information Commissioner's Office (ICO) on the UK GDPR and guidance from the Department for Education (DfE) on Generative artificial intelligence in education.

It also reflects the ICO's guidance for the use of surveillance cameras and personal information.

In addition, this policy complies with regulation 5 of the Education (Pupil Information) (England) Regulations 2005, which gives parents the right of access to their child's educational record.

3. Definitions

Term	Definition
Personal data	Any information relating to an identified, or identifiable, living individual. This may include the individual's: Name (including initials) Identification number Location data Online identifier, such as a username It may also include factors specific to the individual's physical, physiological, genetic, mental, economic, cultural or social identity.
Special categories of personal data	Personal data which is more sensitive and so needs more protection, including information about an individual's: Racial or ethnic origin Political opinions Religious or philosophical beliefs Trade union membership Genetics Biometrics (such as fingerprints, retina and iris patterns), where used for identification purposes Health – physical or mental Sex life or sexual orientation
Processing	Anything done to personal data, such as collecting, recording, organising, structuring, storing, adapting, altering, retrieving, using, disseminating, erasing or destroying. Processing can be automated or manual.
Data subject	The identified or identifiable individual whose personal data is held or processed.
Data controller	A person or organisation that determines the purposes and the means of processing of personal data.
Data processor	A person or other body, other than an employee of the data controller, who processes personal data on behalf of the data controller.

Personal data breach	A breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to personal data.
Local governing committee	School level governance with the terms of reference specified in the Articles
Trust	The Collaborative Learning Trust (CLT)
Headteacher	The lead person in each school.
Governors	The governors appointed by local governing committees of the individual schools and the Directors of the Trust.
Trustees	The Directors of company number 07831080 Collaborative Learning Trust as registered at companies house.
Schools	The academies within the Trust

4. The data controller

The Collaborative Learning Trust (CLT) is a multi-academy trust (MAT) and handles personal data about parents, students, staff, governors, visitors, and others, which makes it a data controller. This is called processing within the legislation. The MAT is registered with the Information Commissioner's Office (ICO) and will pay the required registration fee each year or as legally needed.

5. Roles and responsibilities

This policy applies to all staff and to any outside organisations or individuals working for the Trust. Staff who do not follow this policy may face disciplinary action.

5.1 Board of Trustees

The Board is responsible for ensuring all data protection requirements are met across all CLT academies and the Trust central offices.

5.2 Data Protection Officer (DPO)

The Data Protection Officer (DPO) is responsible for overseeing this policy, making sure we follow data protection laws, and creating related policies and guidelines as needed.

The DPO will provide reports on their work to the data protection lead who will share with the Trust Board and will also share any advice or recommendations on data protection issues when relevant.

The first point of contact for individuals whose data is processed within the CLT is the office manager or data manager. However, individuals may contact the DPO direct if the need arises. The DPO is first point of contact for the ICO.

Our DPO is Richard Lewis-Ogden and is contactable via email at DPO@bywaterkent.co.uk

The CLT is registered with the ICO (Information Commissioner's Office) and has paid the required data protection fee.

5.3 Headteachers

The headteacher of each school has overall operational responsibility for data privacy and control matters. However, the day-to-day activities may be delegated to a named individual within school such as the school's office manager or data manager. Unless delegated, the Headteacher acts as Data Protection Lead within each school.

5.4 Staff

All staff are responsible for:

- Collecting, storing, and using any personal data in line with this policy.
- Letting the MAT know about any changes to their personal information, like a new address.
- Contacting the DPO or the data protection lead in the following cases:
 - If they have questions about how this policy works, data protection law, keeping data, or data security.
 - If they are concerned that the policy isn't being followed.
 - If they are unsure whether they have legal permission to use personal data in a specific way.
 - If they need to seek consent, create a privacy notice, address data protection rights someone has requested, or transfer personal data outside the UK.
 - If there has been a data breach.
 - If they are starting a new activity that might impact individuals' privacy rights.
 - If they need help with contracts or sharing personal data with outside parties.

6. Data protection principles

The UK GDPR is founded on data protection principles that CLT is required to follow. The principles state that personal data must be:

- Processed lawfully, fairly, securely and in a transparent manner
- Collected for specified, explicit and legitimate purposes
- Adequate, relevant and limited to what is necessary to fulfil the purposes for which it is processed
- Accurate and, where necessary, kept up to date
- Kept for no longer than is necessary for the purposes for which it is processed

7. Collecting personal data

7.1 Lawfulness, fairness and transparency

We will only process personal data where we have 1 of 6 'lawful bases' (legal reasons) to do so under data protection law:

- a) The individual (or their parent/carer when appropriate in the case of a pupil) has freely given clear consent
- b) The data needs to be processed so that the MAT can fulfil a contract with the individual, or the individual has asked the MAT to take specific steps before entering into a contract
- c) The data needs to be processed so that the MAT can comply with a legal obligation
- d) The data needs to be processed to ensure the vital interests of the individual or another person i.e. to protect someone's life
- e) The data needs to be processed so that the MAT, as a public authority, can perform a task in the public interest or exercise its official authority
- f) The data needs to be processed for the legitimate interests of the MAT (where the processing is not for any tasks the MAT performs as a public authority) or a third party, provided the individual's rights and freedoms are not overridden

And following the enactment of the Data (Use and Access) Act 2025 the addition of:
g) processing is necessary for the purposes of a recognised legitimate interest

For special categories of personal data, we will also meet 1 of the special category conditions for processing under data protection law:

- The individual (or their parent/carer when appropriate in the case of a pupil) has given explicit consent
- The data needs to be processed to perform or exercise obligations or rights in relation to employment, social security or social protection law
- The data needs to be processed to ensure the vital interests of the individual or another person, where the individual is physically or legally incapable of giving consent
- The data has already been made manifestly public by the individual
- The data needs to be processed for the establishment, exercise or defence of legal claims
- The data needs to be processed for reasons of substantial public interest as defined in legislation
- The data needs to be processed for health or social care purposes, and the processing is done by, or under the direction of, a health or social work professional or by any other person obliged to confidentiality under law
- The data needs to be processed for public health reasons, and the processing is done by, or under the direction of, a health professional or by any other person obliged to confidentiality under law
- The data needs to be processed for archiving purposes, scientific or historical research purposes, or statistical purposes, and the processing is in the public interest

For criminal offence data, we will meet both a lawful basis and a condition set out under data protection law. Conditions include:

- The individual (or their parent/carer when appropriate in the case of a pupil) has given consent

- The data needs to be processed to ensure the vital interests of the individual or another person, where the individual is physically or legally incapable of giving consent
- The data has already been made manifestly public by the individual
- The data needs to be processed for or in connection with legal proceedings, to obtain legal advice, or for the establishment, exercise or defence of legal rights
- The data needs to be processed for reasons of substantial public interest as defined in legislation

Whenever we first collect personal data directly from individuals, we will provide them with the relevant information required by data protection law.

We will always consider the fairness of our data processing. We will ensure we do not handle personal data in ways that individuals would not reasonably expect or use personal data in ways which have unjustified adverse effects on them.

7.2 Limitation, minimisation and accuracy

We will only collect personal data for specified explicit and legitimate reasons. We will explain these reasons to the individuals when we first collect their data.

If we want to use personal data for reasons other than those given when we first obtained it, we will inform the individuals concerned before we do so and seek their permission, where necessary.

Staff must only process personal data where it is necessary in order to do their jobs.

We will keep data accurate and, where necessary, up to date. Inaccurate data will be rectified or erased when appropriate.

In addition, when staff no longer need the personal data they hold, they must ensure it is deleted or anonymised. This will be done in accordance with the most recent Information Record Management Society's Academies Toolkit record retention schedule.

8. Sharing Personal Data

We usually do not share personal data with others, but we may do so in certain cases, such as:

- If there is a concern with a pupil or parent/carer that could put staff safety at risk
- When we need to work with other agencies – we will ask for consent first if appropriate
- When our suppliers or contractors need data to help provide services to staff and pupils, like IT support. In these cases, we will:
 - Only hire suppliers or contractors that can prove they follow UK data protection laws
 - Set up a data sharing agreement, either in the contract or as a separate document, if we are sharing significant or sensitive data, to ensure data is handled fairly and legally
 - Only share the data the supplier or contractor needs to provide their service and any necessary information to keep them safe

We will also share personal data with law enforcement or other public bodies, including other MATS and academies and schools if legally required to do so.

In emergencies affecting our pupils or staff, we may share personal data with emergency services and local authorities to assist them in their response.

If we transfer personal data internationally, including to countries in the European Economic Area, we will follow UK data protection laws.

9. Subject access requests and other rights of individuals

9.1 Subject Access Requests (SARs - also called Data Subject Access Requests or DSARs)

Individuals have the right to request access to personal information that the MAT holds about them.

This may include:

- Confirmation that their data is being used
- Access to a copy of their data
- The reasons for data processing
- The types of data being processed
- Who the data is shared with
- How long the data will be kept, or how this period is decided
- The right to request changes, deletion, restrictions, or to object to data processing
- The right to file a complaint with the ICO or other relevant authority
- The source of the data if not provided by the individual
- Whether automated decision-making affects their data and what impact it may have
- Any protections in place if their data is shared internationally

Subject access requests can be submitted in any format, but we may be able to respond to requests more quickly if they are made in writing and include:

- Name/ Contact address/ Phone number and email
- Information being requested
- Reason for requesting the information (so that we locate and prioritise the datasets that will be of most value).

The ICO has a prescribed form which we encourage use via this link: <https://ico.org.uk/for-the-public/make-a-subject-access-request/subject-access-request-service/>

If staff receive a subject access request in any form, they must forward it to the data protection lead immediately.

9.2 Children and Subject Access Requests

A child's personal data belongs to the child, not to their parents or carers. For a parent or carer to make a request for a child's data, the child must either not understand their data rights or have agreed to the request.

Children under 12 are generally not regarded to be mature enough to fully understand these rights, so most requests from parents for pupils' data may be granted without the child's direct permission. However, this is assessed on a case-by-case basis.

9.3 Responding to Subject Access Requests

When we respond to requests:

- We may ask the individual for a form of ID.
- We may contact the individual by phone to confirm the request
- We will respond within one calendar month of receiving the request or required identification
- We will provide the information at no cost
- If the request is complex, we may take up to three months and will inform the individual within one month, explaining the need for extra time

We may not provide information if it:

- Could seriously harm the physical or mental health of the student or another person
- Involves child abuse details where sharing would not be in the child's best interests
- Contains personal data about someone else that cannot be anonymised, and we do not have consent to share it
- Is part of certain sensitive documents like legal, crime, immigration, management, or exam-related records

The trust will assess what constitutes reasonable and proportionate searches. Subsequently, the trust will undertake the necessary actions to collate the appropriate personal data. Where clarification regarding the scope of a subject access request is required, or where the volume of information is too extensive to process, the trust will contact the data subject to request additional details. The request will be placed on hold until the necessary clarification has been received.

If the request is manifestly excessive, manifestly unfounded, unreasonable or repeated, we may refuse or charge a fee to cover costs. If we refuse a request, we will explain why and inform the individual of their right to contact the ICO or to seek a legal resolution.

The Data Protection Officer shall provide guidance and oversee the response ensuring that this is within the spirit of the principles of the UK GDPR and in accordance with the legislation.

9.4 Other Data Protection Rights of the Individual

In addition to the right to make a subject access request, individuals also have the right to:

- Withdraw their consent to data processing at any time
- Ask for correction, deletion, or limited processing of their data (in certain cases)
- Prevent their data from being used for direct marketing
- Object to data processing based on public interest or legitimate interests
- Challenge decisions made by automated data processing with no human involvement
- Be notified of a data breach (in some cases)

- Submit a complaint to the ICO
- Request that their data be transferred to another party in a structured, common, and machine-readable format (in certain cases)

Individuals can submit requests for these rights to the school office. If staff receive such a request, they should forward it to the data protection lead who may need to consult the DPO.

10. Parental Requests to See the Educational Record

The legal right of parents or those with parental responsibility to access their child’s educational record does not extend to academies. However, the trust will consider requests on an individual basis.

In certain situations, this right may be denied, such as if sharing the information could cause serious harm to the physical or mental health of the pupil or another person, or if it would release exam marks before they are officially published.

If the request is for a copy of the educational record, the trust can charge a fee to cover the cost of providing it.

11. Biometric recognition systems and Artificial intelligence

11.1 Biometric recognition systems

Pupils

Under the Protection of Freedoms Act 2012, a “child” is defined as anyone under 18.

If we use pupils’ biometric data in an automated recognition system (for example, if pupils use fingerprints to receive meals instead of paying with cash), we will follow the rules of the Protection of Freedoms Act 2012.

Parents/carers will be informed before any biometric system is introduced or before their child uses it. CLT will get written or electronic permission from at least one parent or carer before collecting and processing any biometric data from their child.

Parents/carers and pupils can choose not to use the Trust’s biometric systems. We will provide alternative ways for pupils to access these services if needed.

By law, if a pupil does not want to use the biometric system or wants to stop using it, we will respect their choice and not process their data, even if we have consent from the parent or carer.

Staff

If staff members or other adults use the CLT’s biometric systems, we will also obtain their permission before they start using it, and we will offer alternatives if they prefer

not to participate. Staff and other adults can withdraw consent at any time, and CLT will delete any related data already collected.

11.2 Artificial Intelligence (AI)

AI tools are now common and easy to use. Staff, students, and parents may be familiar with generative AI chatbots like ChatGPT and Copilot. CLT understands that AI can help students learn, but it also has risks for personal and sensitive information.

To keep this information safe, no one is permitted to enter personal or sensitive data into unauthorised AI tools or chatbots, please refer to the Trust's list of authorised AI tools for further details. If anyone does enter such data into an unauthorised generative AI tool, CLT will treat it as a data breach and will follow the procedures for handling personal data breaches outlined in Appendix 1.

12. CCTV

If we have CCTV installed, we may use CCTV in different areas around the premises and grounds to help keep the site secure and students and staff safe. We follow the ICO's guidelines on using CCTV and comply with data protection rules.

We do not need to get permission from individuals to use CCTV, but we make it clear where people are being recorded. Security cameras are easy to see, and there are clear signs explaining that CCTV is in use.

Any enquiries about the CCTV system should be directed to the school office at the appropriate school.

13. Photographs and videos

As part of our school activities, we may take photographs and record images of individuals within our schools.

We will obtain written consent from parents/carers before taking photos or videos of their child for communication, marketing and promotional materials. We will clearly explain how the photograph and/or video will be used to both the parent/carer and pupil.

Any photographs and videos taken by parents/carers at school events for their own personal use are not covered by data protection legislation. However, we will ask that those photos or videos, which include other students are not shared publicly on social media for safety reasons, unless all the relevant parents/carers have agreed to this.

Where the Trust and its schools take photographs and videos, uses may include:

- Inside the academy or Trust offices, on notice boards, in prospectuses, brochures, newsletters, etc.
- by outside groups like the photographer, newspapers, or campaigns

Online on our websites or social media pages Parents or guardians can refuse their permission or change their mind at any time. If consent is withdrawn, we will delete the photo or video and take reasonable steps not to share it further. When we use

photos and videos in this way, we will not include any other personal information about the child to maintain anonymity.

14. Data protection by design and default

We will put measures in place to show that we have integrated data protection into all of our data processing activities, including:

- Appointing a suitably qualified DPO, and ensuring they have the necessary resources to fulfil their duties and maintain their expert knowledge
- Only processing personal data that is necessary for each specific purpose of processing, and always in line with the data protection principles set out in relevant data protection law (see section 6)
- Completing privacy impact assessments where CLT's processing of personal data presents a high risk to rights and freedoms of individuals, and when introducing new technologies (the DPO will advise on this process)
- Integrating data protection into internal documents including this policy, any related policies and privacy notices
- Regularly training members of staff on data protection law, this policy, any related policies and any other data protection matters; we will also keep a record of attendance
- Regularly conducting reviews and audits to test our privacy measures and make sure we are compliant
- Putting appropriate checks in place if we transfer any personal data outside the UK where no adequacy agreements are in place
- Maintaining records of our processing activities, including:
 - For the benefit of data subjects, making available the name and contact details of our MAT and DPO and all information we are required to share about how we use and process their personal data (via our privacy notices)
 - data, data subject, how and why we are using the data, any third-party recipients, how and why we are storing the data, retention periods and how we are keeping the data secure (via the Record of Processing Activities)

15. Data security and storage of records

We will keep personal data safe from unauthorised access, changes, processing, or sharing, and protect it from accidental loss, destruction, or damage.

In particular:

- Paper records and portable electronic devices, like laptops and hard drives with personal data, will be kept locked when not in use.
- Papers with confidential personal data should not be left on office or classroom desks, staffroom tables, or in any place that is easily accessible.
- If personal information needs to be taken off grounds, staff must check it in and out at the office.
- Where possible we will implement multi-factor authentication and strong passwords that are at least 10 characters long and include letters and numbers will be used to access computers, laptops, and other devices. Staff and students are reminded not to reuse passwords from other sites.
- We use encryption software to protect all portable devices and removable media, such as laptops and USB drives. Staff, students, or governors who store school information on their personal devices must follow the same security

rules as those for CLT equipment (see our online safety policy / computing & facilities guidance and acceptable use policy).

- When we need to share personal data with a third party, we check that they will store it securely and take steps to protect it (see section 8).

16. Disposal of records

We will securely dispose of personal data that is no longer needed. Personal data that is inaccurate or out of date will also be safely disposed of if it cannot be corrected or updated. For example, we will shred paper records and overwrite or delete electronic files. We may hire a third party to help dispose of records safely for CLT. If we do this, we will ensure that the third party guarantees they follow data protection laws.

17. Personal data breaches

CLT will do everything reasonable to prevent personal data breaches. If we suspect a data breach, we will follow the steps outlined in appendix 1. If we assess the breach to meet the threshold for reporting, we will report the breach to the Information Commissioner's Office (ICO) within 72 hours of discovery.

Examples of breaches in our setting may include but are not limited to:

- A dataset that is not anonymous being posted on the website, showing the exam results of students eligible for pupil premium
- Publishing a photo of a pupil or staff member without explicit consent on school's social media
- Safeguarding information being shared with someone who is not allowed to see it
- The theft of a laptop that has unencrypted personal data about students.
- Attaching the wrong attachment to an email
- A phishing attack where impersonating trusted entities through deceptive emails, messages, or websites to trick individuals into revealing sensitive information, such as passwords or financial details.
- A ransomware attack where malicious software that encrypts data, rendering it inaccessible, and demands payment (a ransom) for the decryption key, often with a threat of data exposure if payment isn't made.

18. Training

All new staff are provided with data protection training as part of their induction process. In line with the ICO recommendation, refresher training will be provided to all staff regularly and not less than every 2 years, forming part of continuing professional development.

The Trust Board will take strategic responsibility to ensure that it has a good understanding of its duties and obligations.

19. Making and Handling Complaints about Personal Data

In accordance with Section 164a of the Data (Use and Access) Act 2025 **Trusts** are now required to include information on how to raise a complaint relating to data protection – see below.

How to Make a Data Protection Complaint

- **Your Right to Complain:** You have the right to make a complaint if you believe school have handled your personal data in a way that breaches the UK GDPR or Part 3 of the Data Protection Act.
- **How to Make a Complaint:** A complaint can be made using the template form in Appendix 2, this is also available directly from the school. Once complete, this should be submitted to the trust
- **Acknowledging a Complaint:** The DPO will acknowledge receipt of a complaint within 30 days.
- **Responding to a Complaint:** Complaints will be investigated as quickly as possible and without undue delay, this will include taking the necessary steps to investigate and deal with any concerns.
- **Keeping You Informed:** As part of handling your complaint, we may make enquiries to better understand what has happened and keep you updated on the progress of our investigation. Once complete, you will be informed of the outcome.
- **Escalation to the ICO:** If a complaint is not resolved by the DPO, the data subject can escalate it to the Information Commissioner for further investigation.

20. Monitoring arrangements

The DPO is responsible for monitoring and reviewing this policy.

This policy will be reviewed annually and not less than every two years, in accordance with the recommendations for statutory policies and will be presented to the Trust Board for approval.

21. Links with other policies

This data protection policy should be read in conjunction with all other relevant policies at both Trust and school level. For example:

- Freedom of information policy
- Staff code of conduct
- Computing Facilities and Acceptable use policy
- Online Safety Policy

Appendix 1: Personal data breach procedure

This procedure is based on [guidance on personal data breaches](#) produced by the ICO.

- On finding or causing a breach, or potential breach, the staff member or data processor must immediately notify the data protection lead person in the /organisation, who will contact the DPO.
1. The DPO will assist in the investigation of the report and determine whether a breach has occurred. To decide, the DPO will consider whether personal data has been accidentally or unlawfully:
 - a. Lost
 - b. Stolen
 - c. Destroyed
 - d. Altered
 - e. Disclosed or made available where it should not have been
 - f. Made available to unauthorised people
 2. The DPO will determine whether to alert the Head Teacher/Chair of Governors
 3. The DPO will assist in making all reasonable efforts to contain and minimise the impact of the breach, assisted by relevant staff members or data processors where necessary. (Actions relevant to specific data types are set out at the end of this procedure)
 4. The DPO will assess the potential consequences, based on how serious they are, and how likely they are to happen.
 5. The DPO will determine whether the breach meets the threshold to be reported to the ICO. This must be judged on a case-by-case basis. To decide, the DPO will consider whether the breach is likely to negatively affect people's rights and freedoms using the ICO's self-assessment tool.
 6. The DPO will ensure that the decision is documented (either way); in case it is challenged at a later date by the ICO or an individual affected by the breach. Decisions are stored on the Data Breach Log.
 7. Where the ICO must be notified, the DPO or data protection lead will do this by telephone or via the ['report a breach' page of the ICO website](#) within 72 hours. As required, they will set out:
 - a. A description of the nature of the personal data breach including, where possible:
 - i. The categories and approximate number of individuals concerned
 - ii. The categories and approximate number of personal data records concerned
 - b. The name and contact details of the person reporting the breach
 - c. A description of the likely consequences of the personal data breach
 - d. A description of the measures that have been, or will be taken, to deal with the breach and mitigate any possible adverse effects on the individual(s) concerned

8. If all the above details are not yet known, the DPO or data protection lead will report as much as they can within 72 hours. The report will explain that there is a delay, the reasons why and when further information can be expected. The remaining information will be submitted as soon as possible.
9. The DPO will also assess the risk to individuals, again based on the severity and likelihood of potential or actual impact and ensure that any decision on whether to contact individuals is documented. If the risk is high, the DPO, or data protection lead will promptly inform, in writing, all individuals whose personal data has been breached. This notification will set out in plain language:
 - a. The name and contact details of the DPO
 - b. A description of the likely consequences of the personal data breach
 - c. A description of the measures that have been, or will be, taken to deal with the data breach and mitigate any possible adverse effects on the individual(s) concerned
10. The DPO will notify any relevant third parties who can help mitigate the loss to individuals – for example, the police, insurers, banks or credit card companies
11. The data protection lead with advice and/or support from the DPO will document each breach, irrespective of whether it is reported to the ICO. For each breach, this record will include the:
 - a. Facts and cause
 - b. Effects
 - c. Action taken to contain it and ensure it does not happen again (such as establishing more robust processes or providing further training for individuals)
12. Records of all breaches will be stored electronically on the designated system.
13. In the case of a significant breach, the DPO, headteacher or designated senior leader will meet to review what happened and how it can be stopped from happening again. This meeting will happen as soon as reasonably possible.

Actions to minimise the impact of data breaches

We will take the actions set out below to mitigate the impact of different types of data breach, focusing especially on breaches involving particularly risky or sensitive information. We will review the effectiveness of these actions and amend them as necessary after any data breach.

Sensitive information being disclosed via email (including safeguarding records)

- If special category data (sensitive information) is accidentally made available via email to unauthorised individuals, the sender must attempt to recall the email as soon as they become aware of the error
- Members of staff who receive personal data sent in error must alert the sender and the data protection lead person as soon as they become aware of the error
- If the sender is unavailable or cannot recall the email for any reason, the data protection lead will ask the ICT department to recall it

- In any case where the recall is unsuccessful, the data protection lead will contact the relevant unauthorised individuals who received the email, explain that the information was sent in error, and request that those individuals delete the information and do not share, publish, save or replicate it in any way.
- Written confirmation that the email has been deleted will be requested from all the individuals who received the data, confirming that they have complied with this request
- In the case of a serious breach, we will arrange for an internet search to be conducted to check that the information has not been made public; if it has, we will contact the publisher/website owner or administrator to request that the information is removed from their website and deleted

Other types of breach that you might want to consider could include:

- Details of pupil premium interventions for named children being published on the website
- Non-anonymised pupil exam results or staff pay information being shared with governors/trustees
- A laptop containing non-encrypted sensitive personal data being stolen or hacked
- The CLT's cashless payment provider being hacked and parents' financial details stolen
